Arimo X

Experience a revolution in your fitness journey with our AI-driven workouts, designed to transcend anything you've ever known before

ArimoX revolutionizes your fitness regimen with its **AI-powered workout management system.**

Transform your solitary workout routine into a **personalized fitness adventure with Arimo X.** Embrace the future of exercise with our AI Personal Trainer, meticulously tailored to suit your unique fitness goals and preferences.

Cutting-Edge Capabilities

Enhance Your Training : Self-Review with Recorded Sessions

Elevate your workout experience with our feature that records every exercise from the start. Analyze and refine your performance by watching your own workout videos, a key to mastering your fitness journey.

Personalized Workout Performance Analysis

Track and enhance your fitness with key metrics like workout duration, reps, posture score, and calories burned, alongside insights on your body's status and environmental factors during exercise.

Personalized Fitness Journey

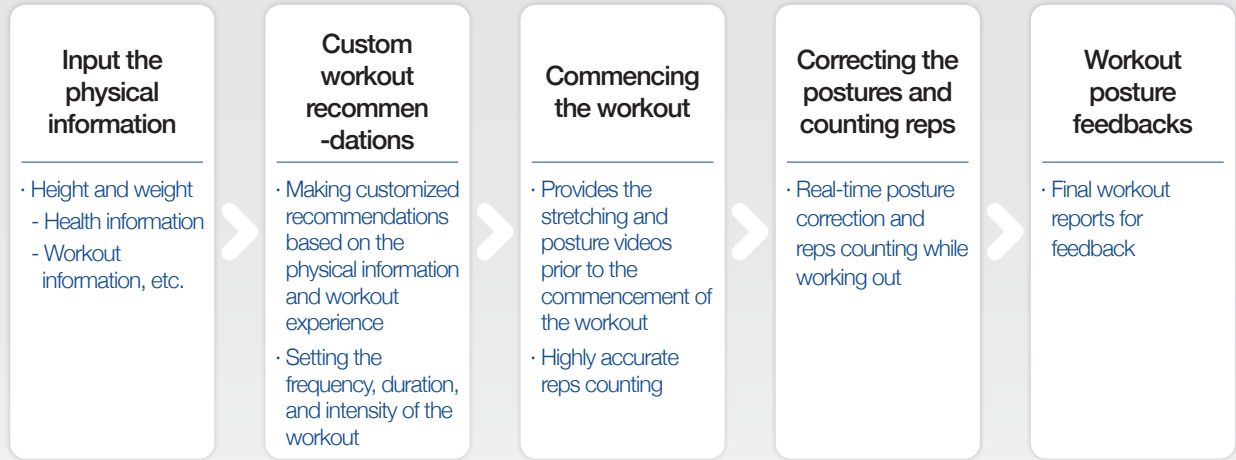

Tailor your fitness regime with our customizable options, where you select the workout type, set your sets and reps, creating a routine that's perfectly aligned with your goals.

Design Your Goals/ Explore Freestyle Fitness

Elevate your workout experience with the freedom to set your own fitness objectives or enjoy a liberating, unstructured exercise session tailored to your mood and preferences.

ArimoX AI PT

Unlock Personalized Training with ArimoX AI: Enter your physical details and let our AI craft a bespoke Personal Trainer experience, uniquely adapted to your body's needs and fitness goals.

ArimoX Distinctive Features

Optimize Your Form

Receive instructional videos demonstrating correct postures before your workout begins, complemented by real-time posture feedback during your session for optimal performance and safety.

Explore Every Fitness Avenue

Seamlessly integrate your existing fitness equipment into our workouts. Stay ahead with continuous updates, ensuring you're always in tune with the latest exercise trends.

Elevate Your Exercise with AI Personal Trainer

Our system not only recommends workouts precisely suited to your physical profile but also manages your sessions by counting reps and critically evaluating your postures, ensuring a highly effective and personalized exercise experience.

Stay Ahead with Ambient Intelligence

Users can access a wealth of environmental data including temperature, humidity, oxygen levels, CO2, and fine dust particles, optimizing their workout conditions for peak performance and safety.

Dive into your workout videos for an in-depth review

Access videos from previous workouts and efficiently organize your exercise history, ensuring a seamless track of your evolving fitness story.

Begin with Ease

Choose from custom routines or opt for our expert-recommended programs, ensuring a smooth start to your fitness sessions.
